SAFPS

SOUTHERN AFRICAN
FRAUD PREVENTION
SERVICE

Intro

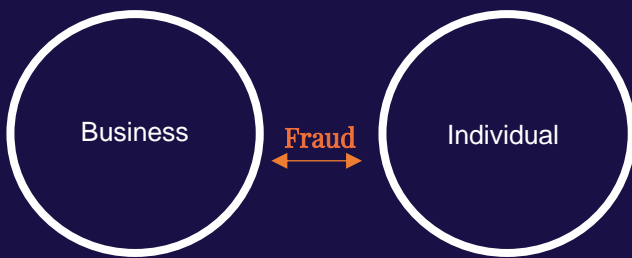

We enable *businesses and individuals* to seamlessly & securely transact with one another in an environment *free of online fraud*

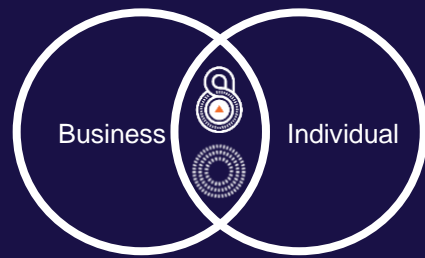

How do we do this?

Our platform *connects* businesses and individuals

The status quo

Our brand promise

We leave **#NoPlaceForFraud**, delivered in a *digitally delightful* way

Our two solutions

Secure Citizen for **Business**

- Remote or physical enrolment & verification
- KYC solutions
- NPO offerings (donor distributions to consumers)
- Consumer's biometrics are stored within a federated database
- Seamless integration into existing business backends using APIs

Secure Citizen for **Individuals**

- Own your identity: Manage who can access & use your data
- Check your details on DHA
- Apply for credit quickly and easily with Secure Citizen empowered Businesses
- Use your biometrics instead of complex passwords
- Easy access to services
- Registration is frictionless and FREE

Our technology: How we close the gap

Businesses & Individuals engage in real time via a **multi-tenanted orchestration** layer that uses **multi-modal biometrics** to verify that the Individual is who they claim to be

Why it's more relevant than ever

South African digital landscape 2021

We're more online than ever before

38.19m Internet users
increased by 4.7%

25m Social media users
increased by 14%

But stats show that fraudsters are winning

Account impersonations
increased by

Bank initiated investigations
increased by 140%

Victims of identity theft
increased by 63%

= Impersonation fraud is everyone's problem

Impersonations growing
70 times faster than

Investigations growing
30 times faster than users

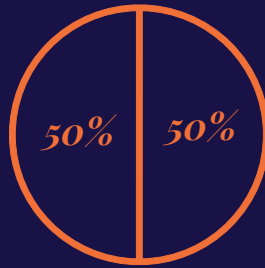

Identity theft is growing
13 times faster than

Our team is a partnership
